## EXPERIENCE

### B2B SaaS Product

#### Vxceed Software Solutions

03/2022 - Present

Vxceed Software Solution developed a B2B app with HTML, CSS, JavaScript, Bootstrap, Vue.js, MySQL. It empowers manufacturers to manage demand chain efficiently, from fulfillment to sales optimization. Centralized platform for demand forecasting, delivery optimization, and sales management. Enables real-time analysis, minimizes out-of-stock, enhances ROI, applies research-backed methodologies for improved decision-making.

##### Achievements/Tasks

- Implemented Load Out of Inventory feature in **Vietnam and Cambodia** sections, using custom **Vue directives** for enhanced user interaction. Integrated **Syncfusion** library for seamless display of inventory data, empowering informed decisions. Developed system to auto-generate bills upon item delivery, ensuring streamlined billing processes in specified regions.
- Implemented a currency conversion feature tailored to the specific countries of clients, employing **Vue filters** for seamless transformation of individual variables. Employed **JavaScript Internationalization** to facilitate dynamic and accurate currency adjustments based on the respective countries of clients, ensuring a localized and user-centric experience.
- Utilized **VueX** stores for efficient state management, handling currency, default values, and configuration. Ensures robust, centralized tracking of dynamic changes, catering to Product Distributors' needs. VueX enhances modularity, maintainability, and scalability for complex state management.
- Engineered a comprehensive solution for the dynamic management of promotions and discounts within multiple sections of the invoicing system. Leveraged **Vue utility functions** to intricately handle the updating of promotion details, allocation processes, and the strategic movement of items across various promotions. Incorporated sophisticated logic to determine promotion eligibility.
- Designed Screens meant for Promotion, Inventory used Sychfusion, **Vue 3, Vue 2**
- Facilitated team understanding of Syncfusion library components, especially in challenging CRUD operation tracking. Provided substantial support by clarifying component interplay, enhancing comprehension and integration within the application architecture.
- Handled the team of 5 in implementation of Project named Central which has functionalities associated with master data of the DMS application, Played pivotal role in implementation of Microservices in the Front end part of the project

## PERSONAL PROJECTS

### E commerce website (Vue.js), Amazon Clone(React)

- Developed a Ecommerce website using **Vue.js, Vuetify, Vuex, Router** which enables user to perform all the basic operation associated with online shopping
- Developed a Ecommerce website using **React.js, Redux, Router** which enables user to perform all the basic operation associated with online shopping

## EDUCATION

### B.Tech in Civil Engineering

#### S.J.B INSTITUTE OF TECHNOLOGY

08/2016 - 10/2020

CGPA : 7.2

### PU

#### S.G.P.T.A

2014 - 2016
